

# ezlo plus

Smart Home Controller

## Quick Start Guide

**vera**  
an ezlo company

## Thanks for choosing the Ezlo Plus

You've taken the first step toward  
making your home smarter  
and safer.

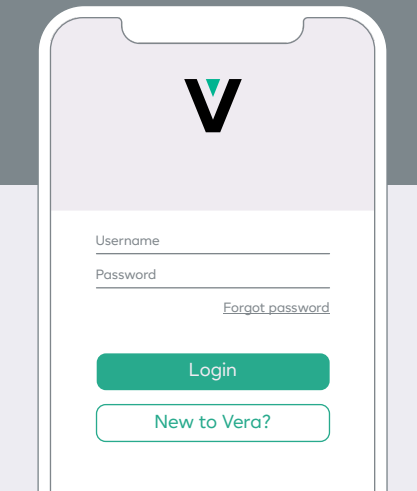

**It's easy to set up your hub.  
Here is what you have to do.**

Install the Vera app on your mobile device.  
Just look for the **V** in the iOS App Store or  
on Google Play. If you already have the Vera  
app, just log in.

If you just downloaded the app, tap on New to Vera and select Ezlo Plus from the list of controllers.

If you already have an account, tap Add New Controller and select the Ezlo Plus from the My Controllers list.

The image shows a stylized smartphone screen with a light purple header containing the Vera logo (a black 'V' with a teal triangle above it). Below the header is a white login form with the following elements:

- A text input field labeled "Username" with a horizontal line below it.
- A text input field labeled "Password" with a horizontal line below it.
- A link labeled "Forgot password" with a teal underline.
- A teal rounded rectangular button labeled "Login".
- A white rounded rectangular button with a teal border labeled "New to Vera?".

Next, connect the A/C power adapter to your Ezlo Plus. Once it is powered on, the LED should slowly change from green to blue. Wait for a steady blue light before proceeding.

The Ezlo Plus supports both wired and wireless setup. Select your preferred option and follow the prompts.

Follow these steps to connect your Ezlo Plus using wireless setup.

Wireless setup

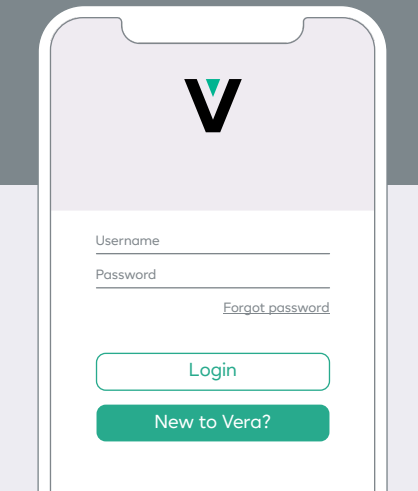

Follow these steps to connect your Ezlo Plus using wired setup.

Wired setup

Congratulations! Your Ezlo Plus is now connected and its LED will remain steady blue.

If you don't already have one, it's time to create your account. The app will walk you through it.

The image shows a stylized illustration of a smartphone. The screen displays the Vera app's login interface. At the top of the screen is the Vera logo, a large black 'V' with a teal triangle pointing downwards from its top center. Below the logo are two input fields: 'Username' and 'Password', each with a horizontal line underneath. To the right of the 'Password' field is a link that says 'Forgot password' with a teal underline. Below the input fields is a rounded rectangular button with a teal border and the text 'Login' in teal. At the bottom of the screen is a solid teal button with the text 'New to Vera?' in white.

Start using your Ezlo Plus by adding devices like lights, thermostats, sensors, and more. Just tap the menu icon at the top left of the dashboard, select Devices, and then tap the + sign to launch the Device Pairing Wizard.

## **Make your home safer. Make your life easier.**

The Ezlo Plus lets you control Z-Wave, Zigbee, and Wi-Fi devices from a single app. When you add devices such as lights, thermostats, sensors, cameras, and door locks to your Vera system, you'll be able to enjoy greater comfort and peace of mind with just a touch.

## **Control your home from anywhere.**

The Vera app offers some key features that help you simplify things at home and help you keep an eye on things when you're away.

### **Modes**

Modes give you the power to control all your devices with a single tap. There are pre-set modes for Home, Away, Night, and Vacation.

### **Scenes**

The true power of home automation is when your home can do things for you. With Scenes you can schedule your lights to turn off when you leave for work in the morning, or to fade up as day turns to night.

### **Notifications**

Your Vera system can send push notifications and emails to let you—or other users—know about what's going on at home.

### **Ezlo VOI**

This powerful tool lets you use your voice or a scene to control over 27,000 Wi-Fi devices associated with Amazon Alexa or Google Assistant.
