Region	Agency	Certification
US and Canada	* 	Control No.3170792 Conforms to ANSI/UL Std. 639 Conforms to ULC Std. S306-03
	*FCC	FCC Part 15 Class B
	*IC	RSS247, issue 1, Cert No: 1249A-PRZB
		This ZigBee® Certified product works in global 2.4 GHz networks supporting ZigBee HA 1.2. ZigBee® Certified is a registered trademark of the ZigBee Alliance. ZigBee Cert No.ZIG16055ZHA25779-24
* ONLY for models RFPR-ZB, RFPR-ZB-ES, and RFPR-ZB-MS		

Changes or modifications not expressly approved by Bosch Security Systems, Inc. can void the user's authority to operate the equipment.

FCC/IC

This device complies with part 15 of the FCC Rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada.

Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

Optional Brackets: B338, B335

A mounting bracket can reduce the detector's range and create dead zones.

Not investigated by ETL.

Not EN50131 compliant.

La certificazione IMQ decade nel caso di installazione del rilevatore con gli snodi opzionali.

Small animal immunity

The small animal immunity feature was not investigated by ETL.

Nicht für VdS Anlagen.
